Peumulia Jamee Adat Geutanyoe

An Acehnese proverb that embodies one of its most important traditional values, to welcome guest with open arms and put forward unity and cooperation, which is instilled in Aceh Region for many generations.

Muzakir Manaf

Governor of Aceh

REMARKS

With great gratitude and pride, we present the Aceh Presentation Book 2026 as a reflection of the Aceh Government's strong commitment to showcasing our region's vast potential to the world

Aceh is not merely a land rich in natural resources; it is a region grounded in enduring values and a strong cultural heritage. We uphold the philosophy "*Peumulia Jamee Adat Geutanyoe*," which embodies our spirit of hospitality, respect, unity, and cooperation. This principle continues to guide how we engage with partners, investors, and stakeholders at both national and global levels.

As an integral part of Indonesia's resilient and growing economy, Aceh is undergoing a significant transformation into a new center of growth in the western region of the country. Supported by our special autonomy framework, we offer a distinctive investment ecosystem that integrates Islamic finance principles with an open, competitive, and globally adaptive environment. We remain committed to strengthening human capital, enhancing strategic infrastructure, and streamlining regulations to ensure a conducive, transparent, and competitive investment climate.

Strategically located at the northern gateway of Indonesia and along the Malacca Strait, one of the world's busiest international shipping lanes, Aceh holds a vital position as a hub for trade, logistics, and tourism. Our proximity to key regional growth centers further enhances our competitiveness and accessibility as a promising investment destination.

Through this publication, we warmly invite investors, business leaders, and development partners to explore the wide range of opportunities available in Aceh, from leading sectors and strategic commodities to our "Top 12 Must-Visit Destinations." We firmly believe that strong collaboration will drive inclusive and sustainable economic growth for the future.

We would also like to express our highest appreciation to the Bank Indonesia Representative Office of Aceh Province (Bank Indonesia Kantor Perwakilan Provinsi Aceh), the Aceh Investment and One-Stop Services Agency (DPMPTSP Aceh), and all related institutions for their exceptional synergy and dedication in bringing this publication to life. This collaboration reflects our shared commitment to delivering professional, reliable, and investor-friendly services.

We warmly invite you to be part of Aceh's development journey. Let us invest, collaborate, and grow together toward a more advanced, inclusive, and sustainable future.

Muzakir Manaf, Governor Aceh

BANK INDONESIA
BANK SENTRAL REPUBLIK INDONESIA

National Economy

Indonesia is the world's fourth most populous country, an archipelago nation including over 300 ethnic groups, the sixth largest economy in the world in terms of purchasing power parity, and a G-20 member.

Country Profile

Capital City: Jakarta **Provinces:** 38 Provinces **Municipalities:** 416 Regencies & 98 Cities

Resilient Economy

As the largest economy in Southeast Asia, Indonesia has charted impressive economic growth since overcoming the Asian financial crisis of the late 1990s. Furthermore, Indonesia has made enormous gains in poverty reduction, cutting the poverty rate by more than half since 1999, to just under 10 percent in 2020. **Indonesia is projected to be the fourth-largest economy in the world by 2050.**

International Trade

As an integral part of the global value chain, Indonesia has recorded consistent trade surpluses due to robust export growth. Commodities Exports account for approximately **60 percent** of all Indonesia's exports. Indonesia records trade surpluses mainly with India, the United States, and Malaysia.

Human Resources

Indonesia is set to experience a demography bonus as its population of **productive age (15-64 years) accounts for more than 70% of the country's total population**. This productive population is more than ready to support any investment coming into the area as Indonesia enters the world's "top movers" in HDI Improvement.

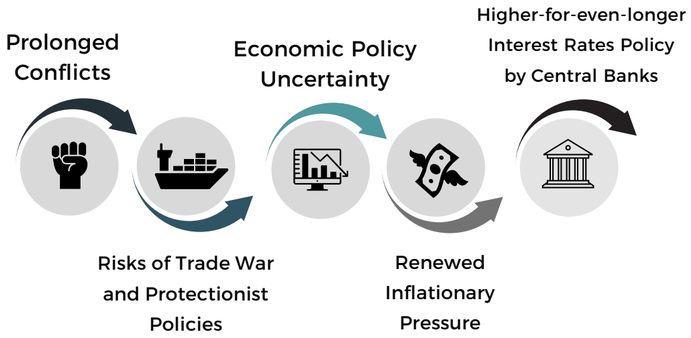

Geographical Position

Indonesia is an archipelagic country in Southeast Asia, situated between the Indian Ocean and the Pacific Ocean. It is strategically located astride or along major sea lanes connecting East Asia, South Asia, and Oceania. At the same time, Indonesia is also the largest archipelagic country in the world.

Macroeconomic Overview

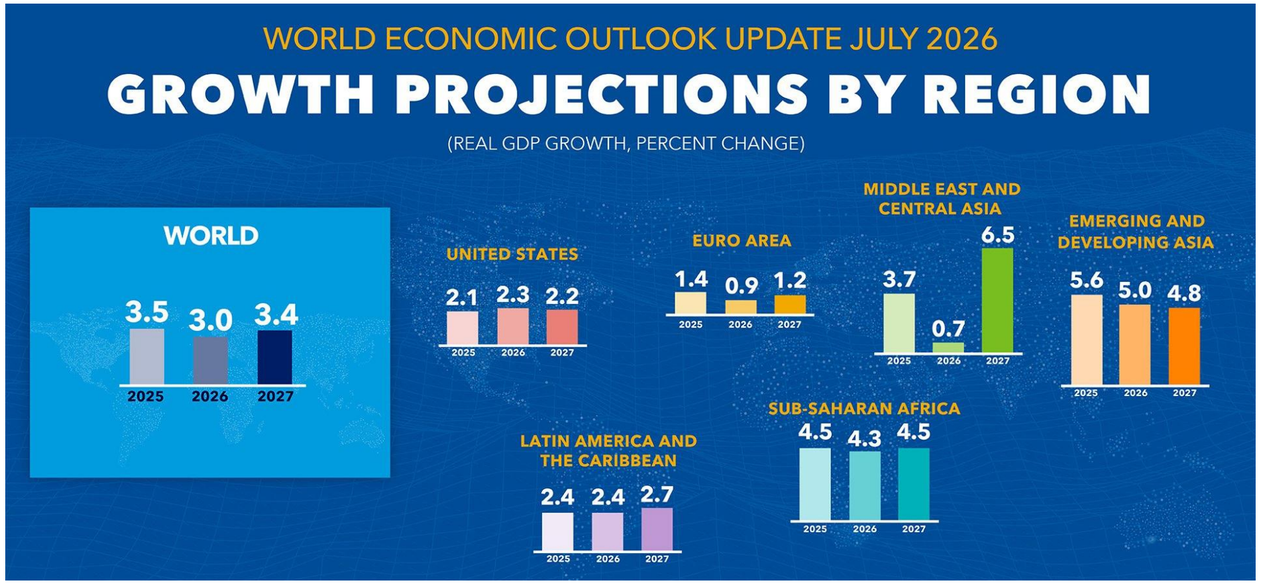

Global Economic Challenges in 2026

Indonesia Economic Prospect

Bank Indonesia forecasts domestic economic growth in 2026 within the range of 4.9-5.7% (yoy), underpinned by increasing investment, particularly non-building investment. Meanwhile, efforts are required to boost household consumption, thereby bolstering domestic demand. Externally, various efforts to strengthen exports must be increased to mitigate the impact of weaker demand in Indonesia's major trading partner countries.

Global Economic Growth Projection

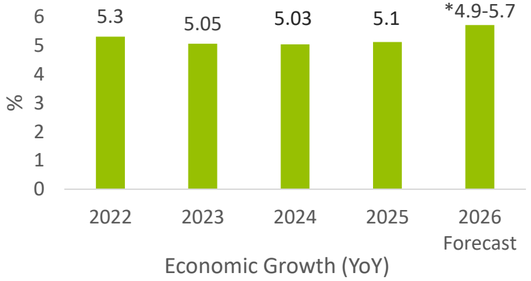

Source: IMF, World Economic Outlook Update July 2026: Global Economy in Crosscurrents of War and Technology

Global growth is projected at 3.0 percent for 2026 and 3.4 percent for 2027, broadly unchanged cumulatively from the April 2026 World Economic Outlook. The outlook is uneven: The war shock is weighing on energy importers and vulnerable economies, while AI-driven demand is lifting countries integrated into the global technology value chain.

Global disinflation has stalled. Risks are more balanced than in April, but downside risks from renewed conflict and financial market repricing persist. Policymakers should preserve price stability, rebuild fiscal space, and strengthen adaptability.

Indonesia Economic Growth Projection

In the midst of global economic moderation, economic growth in Indonesia remains solid. Bank Indonesia projected solid economic growth in 2026 with a bias towards the upper bound of the range between 4.9-5.7%, supported by the likes of improving domestic demand and persistently strong export performance and down-streaming for strategic commodities

Source: Bank Indonesia

Global Perspective

S&P Global Ratings

- We expect the government to keep fiscal deficits below 3% of GDP over the next three years, despite higher spending on social programs.
- Indonesia's continued development of its commodity-related industries and investments in downstream sectors should contribute to stable external metrics amid rising external uncertainties.
- We affirmed our 'BBB' long-term and 'A-2' short-term sovereign credit ratings on Indonesia.
- The outlook on the long-term rating is stable, reflecting our expectation of continued fiscal discipline and a stable economic outlook.

Fitch Ratings

- Financial Services Authority (OJK) sees that Fitch Ratings' announcement maintaining the Sovereign Credit Rating of the Republic of Indonesia at 'BBB' with a stable Outlook is proof of global confidence in the resilience of the Indonesian economy.
- The effort is made through four key initiatives in 2025: strengthening financial sector capacity and supervision, maximizing financial sector contributions to national development goals, promoting inclusive and sustainable financial sector growth, and enhancing integrity enforcement and consumer protection to boost investor confidence.

Moody's

- The Financial Services Authority (OJK) has taken note of Moody's Investors Service's decision to reaffirm the Republic of Indonesia's Sovereign Credit Rating at Baa2, while revising the outlook from Stable to Negative.
- OJK views the rating affirmation as confirmation of Indonesia's solid economic fundamentals, supported by relatively strong economic growth, disciplined macroeconomic policy frameworks, and a resilient financial services sector amid heightened global uncertainty. Moody's also emphasizes that Indonesia's economy remains resilient, underpinned by structural strengths and prudent fiscal and monetary policies.

Aceh Macroeconomic Overview

Despite temporary supply adjustments and festive seasonal factors, Aceh's managed inflation trajectory reflects a resilient economy poised for steady consumer momentum and agricultural recovery.

Inflation Level Comparison: Aceh & National

Source: BPS, processed

In August 2026, Aceh recorded a monthly inflation rate of 0.28% (mtm) and an annual inflation rate of 4.86% (yoy), driven by robust public programs and seasonal demand, while maintaining long-term economic resilience and stable consumer markets through strong agricultural productivity and accelerating regional infrastructure development.

Inflation sits above the national target, yet recent data projects a clear path toward sustained economic improvement

Top 5 Inflationary goods in August (mtm)

PAM Water Tariff

Purebred Chicken Meat

Rice

Bird's Eye Chili

Cement

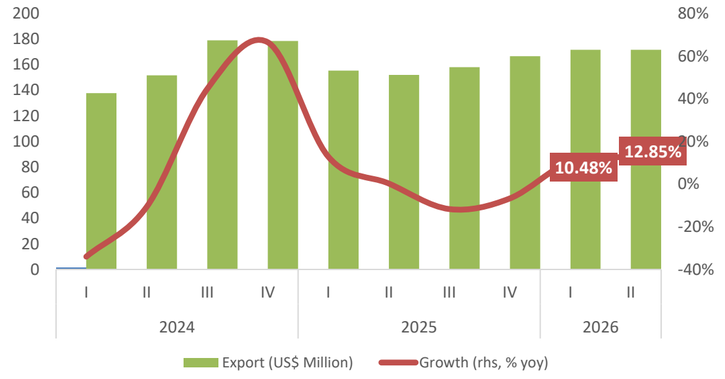

Prioritizing inflation awareness to all stakeholders by raising the issue in related forums should alleviate the root causes of inflation.

Aceh inflation level by the end of 2026 will be approximately within the range of the national inflation target of 2.5% ± 1%

Aceh Macroeconomic Overview

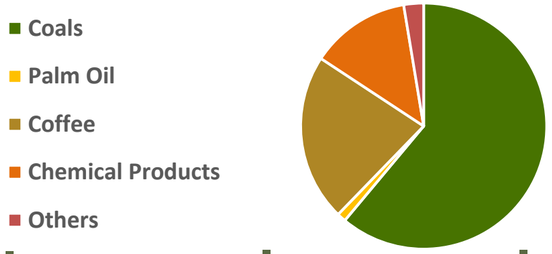

Aceh's economy shows promising momentum, driven by strong export performance and resilient investment financing

Export Performance (Non-Oil & Gas)

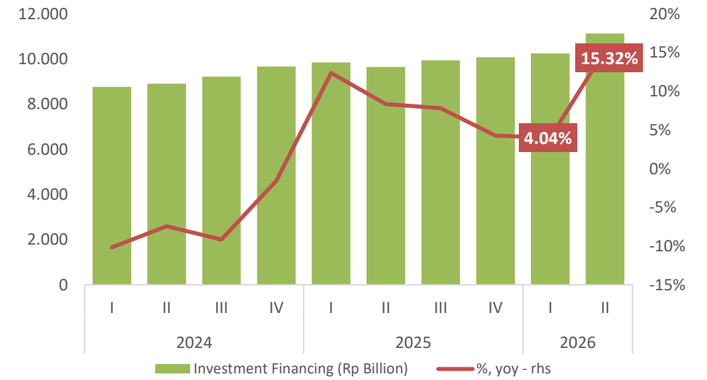

In the 2nd Quarter of 2026, Export Activities in Aceh grew by 12.85% (yoy) and was recorded at USD 171.52 Million

Prominent commodities in Aceh are coals, palm oil, coffee, and chemical products.

Investment Financing

In the 2nd Quarter of 2026 Investment Financing in Aceh grew by 15.32% (YoY) and was recorded at IDR 11.13 Trillion.

Investments will kick-start a multiplier effect in the economy and boost growth across multiple sectors. An increase in investments will help to drive aggregate demand and short-run economic growth.

Source: Bank Indonesia Internal Source, Statistics Department

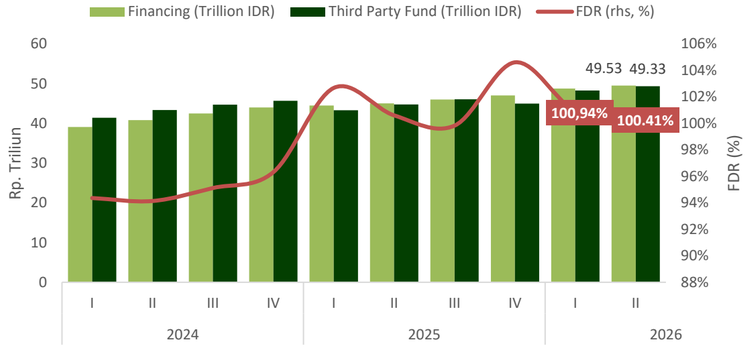

Banking Industry in Aceh

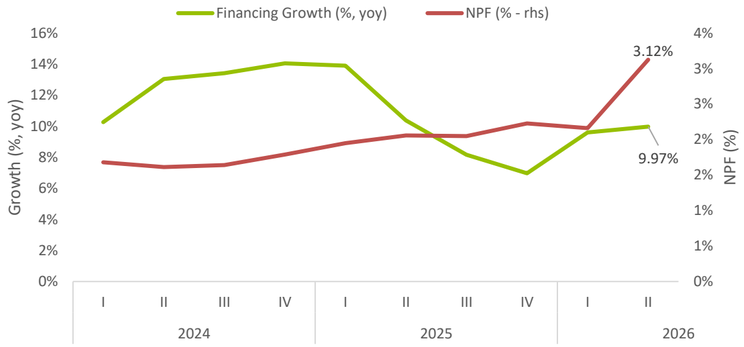

Following a major banking reform in 2018, Aceh's financial sector stayed resilient, showing growth in financing, assets, and third-party funds. With the rise of sharia-compliant financing, this optimism is set to continue, driving future growth.

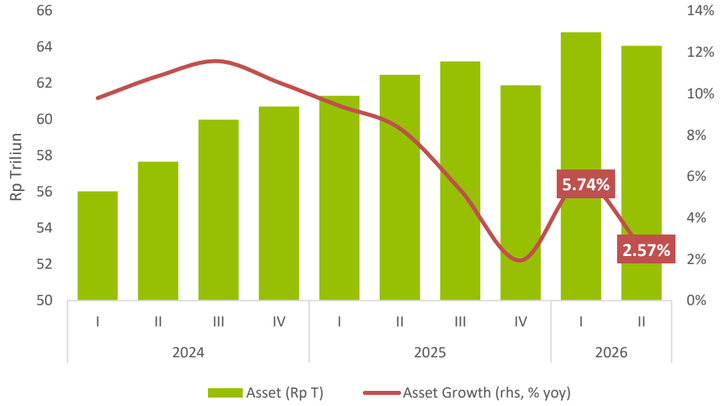

Keeping the financial industry prudent is crucial in maintaining economic stability. Macroprudential stability of the financial sector must be kept in order to keep a healthy and seamless intermediaries that help in boost the economy

Aceh financial system has a distinctive characteristic with the implementation of The Sharia Financial System Law since 2018.

With the full implementation of The Sharia Financial System Law in Aceh on January 4th, 2022, all banks and non-bank financial service institutions must convert their businesses and operations to sharia-compliant system within the 3-year transitional period.

The resiliency of the financial sector in Aceh is also reflected on the ever-increasing numbers of financing, third-party funds, and FDR

Recently, the financing to deposit ratio (FDR) was recorded at a good level at 100.41%. The total amount of financing in Aceh was recorded at IDR 49.53 Trillion, whilst the third-party funds currently stands at IDR 49.33 Trillion.

There is a slight decrease of NPF from 2.16% in the 1st quarter of 2026 to 3.12% in the 2nd quarter of 2026. This NPF ratio is still way well below the healthy limit of 5%.

Source: Bank Indonesia Internal Source, Statistics Department

Total Assets of Banks in Aceh as of Q2 2026 is at IDR 64 Trillion

After experiencing a major regulatory change in the banking system in 2018, the entire financial sector in Aceh remained optimistic, as shown by increases in financing, assets, and third-party funds. The optimism is poised to continue into the years ahead, as sharia-compliant financing is growing and increasingly preferred.

Regional Development Plan

Aceh's regional development plan is driven by 5 Strategic Pillars, designed to foster sustainable growth, strengthen the economy, and improve the well-being of its people

Human Resources & Social

- Strengthening the quality and competitiveness of human resources through education, health, and skills development
- Promoting gender equality and inclusive development for women, children, and persons with disabilities
- Accelerating digital transformation and technological adoption across sectors
- Preparing a future-ready workforce through targeted training and capacity
- Ensuring sustainable education financing through the Education Endowment Fund and Excellence Scholarship
- Improving teacher quality and school standards to produce globally competitive graduates

Economy

- Strengthening Aceh's economic independence through sustainable food, energy, water, green, and blue economy development
- Promoting downstream processing and industrialization to increase the added value of natural and maritime resources of Aceh
- Expanding quality employment opportunities and supporting entrepreneurship, halal industry, tourism, creative industries, and sports economy
- Developing Aceh as a regional food hub to achieve food self-sufficiency through modern, integrated, and technology-based agriculture
- Enhancing local capacity and institutions to manage mineral, forestry, energy, and other natural resources for long-term public prosperity for Aceh

Regional Development Plan

Law and Governance

- Enhancing government governance through comprehensive digitalization, institutional reform, and capacity building to improve transparency, accountability, efficiency, and the quality of public service delivery across all levels of government
- Maintaining political stability and social harmony while strengthening law enforcement, regulatory frameworks, and legal certainty to support a secure, fair, and conducive environment for development and investment
- Advancing political, legal, and bureaucratic reforms through merit-based systems, performance-oriented management, and integrity strengthening, while intensifying anti-corruption efforts and supporting comprehensive drug prevention, rehabilitation, and eradication programs

Infrastructure & Environment

- Strengthening basic infrastructure and public services to improve community welfare
- Enhancing inter-regional connectivity through equitable and integrated development
- Promoting balanced regional growth and reducing urban–rural disparities
- Preserving environmental sustainability and ecosystem resilience
- Implementing sustainable development to ensure long-term quality of life

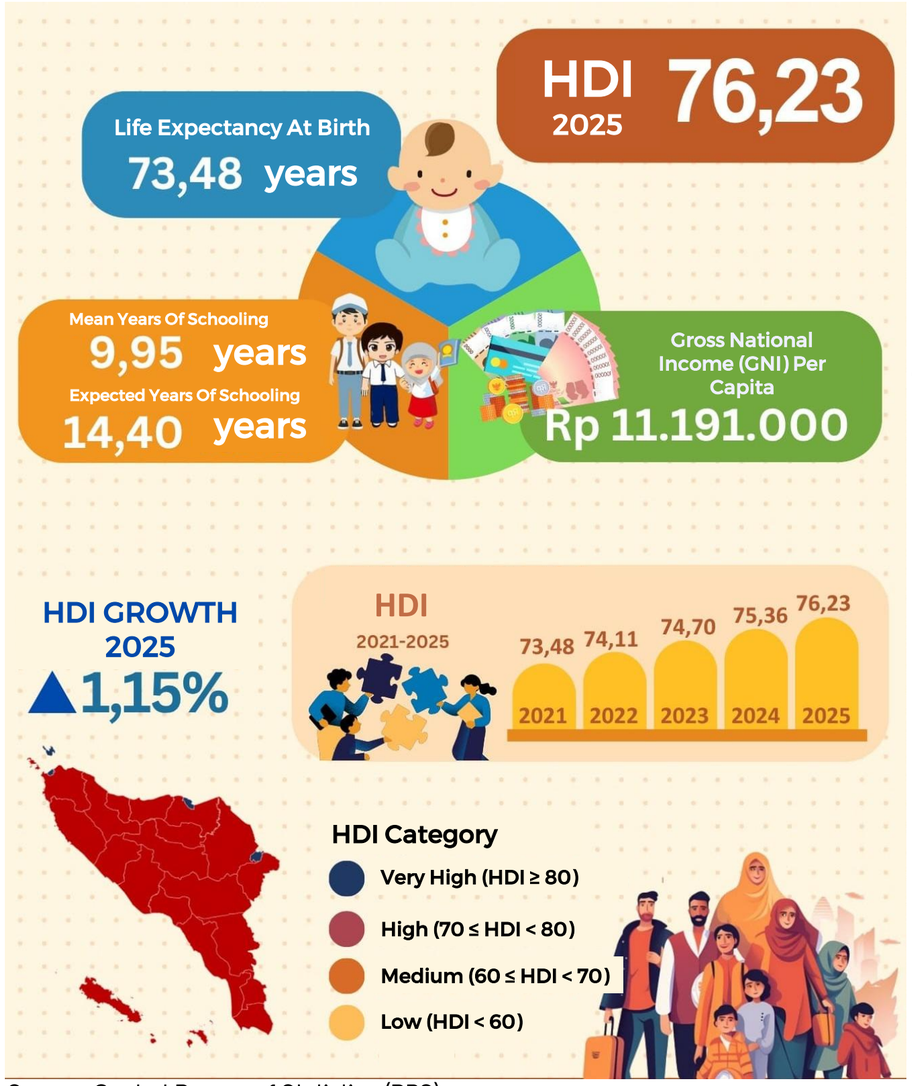

Special Autonomy and Privileges

- Strengthening the implementation of Islamic law in social, economic, and public life in a comprehensive and balanced manner
- Ensuring the effective implementation of Aceh's special autonomy and privileges in accordance with the Helsinki MoU and the Law on the Governance of Aceh (UUPA)

PPP Scheme

The Public-Private Partnership (PPP) scheme offers 5 flexible options, providing investors with a range of tailored approaches to collaborate, innovate, and drive growth across 18 priority sectors — ensuring adaptability and mutual benefit

Operation & Maintenance

Private operator/business entity, based on the contract, operates Government-owned assets (ex. water/wastewater treatment plants) for a certain periods of time. Ownership of fixed assets on the Government.

Build-Finance

Private/business entity builds assets and finance capital costs only during the construction period

Design-Build-Finance-Maintenance

Business entities design, build, finance assets and provide maintenance services (hard facilities management) based on long-term agreements

Design-Build-Finance-Maintain-Operation

Business entities design, build, finance, and provide maintenance and operations services under a long-term agreement. Asset operations are also included in projects such as the operation of bridges, roads, and water treatment plants.

Concession

A private sector / business entity concession holder invests and operates the facility for a certain period of time, after which the ownership period is returned to the government

1 FISHERY PRODUCT FREEZING BUSINESS

This investment project successfully passed the curation process conducted by Bank Indonesia and the PwC Indonesia Team in 2025

FISHERY PRODUCT
FREEZING BUSINESS

Project Description

- West Aceh Regency in Aceh Province stands at the forefront of Indonesia's rapidly evolving fishery sector, thanks to its abundant marine resources and strategic coastal location. With growing global demand for fresh, sustainably sourced seafood, establishing a modern fishery product freezing business here offers a prime opportunity to deliver high-quality products to both domestic and international markets
- This project is located in a strategic location of State Fisheries Management Area of Indonesia (WPP-NRI) 572, which covers the waters of the Indian Ocean, West Sumatra, and South Sunda that are very potential and hold abundant marine resources.
- Its strategic location makes West Aceh Regency have a big potential as an export fisheries center in the Western Indonesia Region.
- The activities of this investment opportunity include the buying of fresh catch from local fishermen, the freezing of fish to preserve peak quality, and the sale of premium marine commodities—such as snapper, tuna, mackerel tuna, shrimp, and more—to both domestic and international markets.
- The main target for freezing fishery products is the domestic market, particularly North Sumatra and West Sumatra, as well as the export markets of Malaysia, Singapore, and Japan.
- Accessibility to Airport Facilities: SIM Airport, Banda Aceh - 250 km (4 hour and 30 minutes)
- Accessibility to Export Port Facilities: Belawan Port, North Sumatra- 583 km (14 hour 30 minutes)

2 LHOKNGA GOLF AND MARINE SPORT RESORT

LHOKNGA GOLF AND MARINE SPORT RESORT

Project Description

- Nestled along the stunning coastline of Aceh, the Lhoknga Golf and Marine Sport Resort embraces the boundless potential of marine sports, enriching the experience for visitors seeking both leisure and adventure. Beyond the verdant greens of the golf course lies a vibrant aquatic playground, inviting enthusiasts to immerse themselves in a world of exhilarating water-based activities.
- Golf course development is an integral part of Aceh tourism; the golf course can be rented out for many segments and serve as an entertainment and tourism activity in the area.
- Additional business lines that may be explored include the sale of golf-related equipment and spare parts, such as replacement carpets, golf balls, clubs, and other accessories, as well as golf training programs for both children and adults.
- Potential Marine Sports Activities: Jet Skiing, Paddleboarding, Surfing, Diving, Sailing, Snorkeling, Deep-sea fishing, and Eco-Conscious Conservation
- Accessibility to City Center: Banda Aceh city center - 16 km (30 minutes)
- Accessibility to Airport Facilities: SIM Airport - 26 km (40 minutes)
- Accessibility to Iconic Tourist Sites: Lampuuk Beach & Lhoknga Beach (5 minutes), Tsunami Museum (30 Minutes), Baiturrahman Grand Mosque (28 Minutes)

TOP 12 MUST VISIT DESTINATIONS IN ACEH

Source : IG-wisatareligiaceh & Detik Travel

GRAND MOSQUE BAITURRAHMAN

The mosque plays a significant role in Acehnese culture and traditions. It's a center for religious gatherings and celebrations, reflecting the deep Islamic faith of the people.

The mosque is situated in the heart of Banda Aceh City, the capital city of Aceh Province, Indonesia. It's easily accessible and a prominent landmark in the city.

Mesjid Raya Baiturrahman is approximately 15 kilometers away from Sultan Iskandar Muda Airport

ACEH TSUNAMI MUSEUM

The Aceh Tsunami Museum serves as a tribute to the victims of the devastating 2004 Indian Ocean earthquake and tsunami, while also acting as an educational center and emergency shelter.

The Aceh Tsunami Museum is located on Jalan Iskandar Muda Street, Banda Aceh City, around 16 kilometers from Sultan Iskandar Muda Airport. The Museum building has adopted the traditional raised Aceh House, while at the same time, it resembles a ship with its protruding funnel

The main attractions of the museum include educational experience, architectural design, disaster emergency preparedness learning center

LHOK MATA IE BEACH

Pantai Lhok Mata Ie, also referred to as Lhok Mata Ie Beach, is a hidden gem located in Aceh Besar Regency, Indonesia. It's a beautiful beach tucked away behind hills, offering a serene escape for visitors.

Unlike other beaches that can get crowded, Lhok Mata Ie offers a more tranquil experience. The beach itself is scenic with its white sand and clear blue waters.

Lhok Mata Ie is situated in the Lampageu Sub-district, Aceh Besar Regency, Aceh Province. It is 21 KM from Sultan Iskandar Muda Airport (Banda Aceh International Airport)
Visitors can enjoy swimming, sunbathing, or simply relaxing on the shore. Other activities include camping, fishing, and hiking.

IBOIH BEACH & RUBIAH ISLAND

In Sabang City, Aceh Province, nestled a beautiful beach that is always sought after by tourists, named Iboih Beach (Pantai Iboih). Iboih Beach is famous for its clear seawater and beautiful coral and marine ecosystem beneath its waters. Travel time from Banda Aceh to Sabang is around 40 minutes by fast boat.

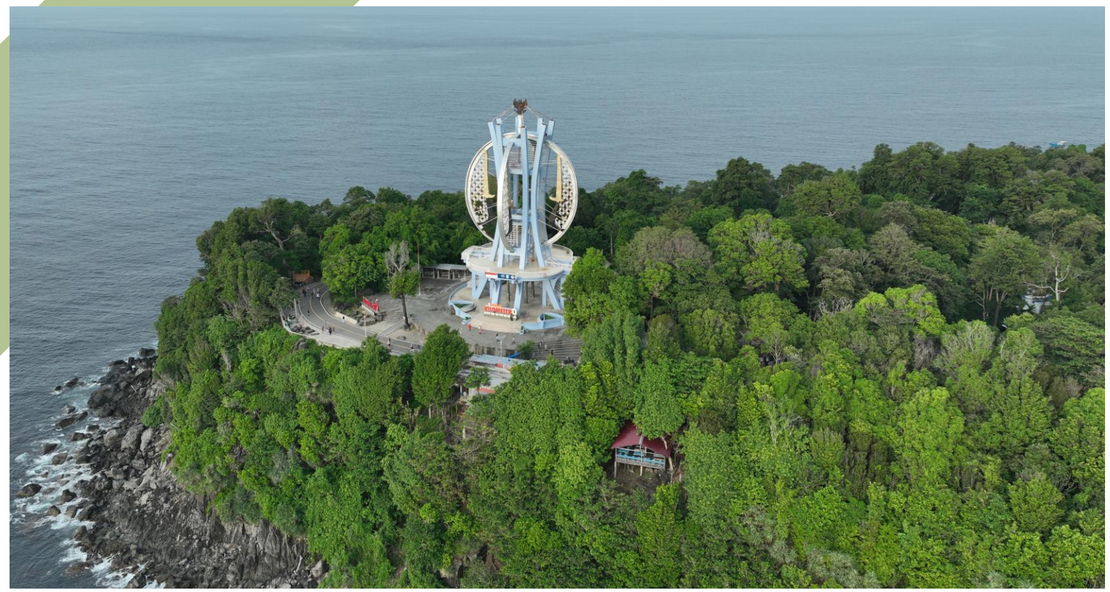

Across the Iboih Beach, in Rubiah Island, you can experience many marine activities, including snorkeling, diving, dolphin tours, and multiple water sports. Iboih Beach & Rubiah Island is one of the most popular tourist destinations in Aceh Province.

Fishery

From world-renowned Arabica coffee to palm oil, cocoa, patchouli, fisheries, and livestock, Aceh's leading commodities offer strong export potential and expanding downstream opportunities. Supported by **four strategic economic zones**— SEZ Arun Lhokseumawe, Sabang FTZ, Aceh Industrial Area Ladong, and Kutaraja Fishery Port—Aceh provides competitive incentives, integrated infrastructure, and clear pathways for sustainable investment growth.

Palm Oil Industry

Aceh has 268,189 hectares of palm oil plantations, which produced 508,134 tons in 2024. Palm oil is the largest plantation crop in Aceh by volume, area, and economic value. The palm oil industry has significant growth potential as a major source of supply for food products and biofuels. With the increase in production, Aceh is encouraging the construction of CPO factories and their derivative products.

List of Palm Oil Industries

by Regency/City in Aceh Province, 2024

- Creating operational and policy support for sustainable palm oil commodities among the government, the private sector, nongovernmental organizations (NGOs), and the community.
- Supporting public-private investment corporation of palm oil.
- Reducing threats to high-value forest ecosystems and peat swamp ecosystems.
- Creating a program for the certification and distribution of provincial palm seeds.
- Improving the supply chain and pricing transparency for palm oil production and processing.

Crude Palm Oil (CPO) is the main product of the palm oil industry. Nagan Raya, Aceh Singkil, Aceh Timur, Aceh Tamiang, and Aceh Barat Daya are the regencies that produce the most CPO. Therefore, these areas are suitable for the development of the palm oil processing industry.

Arabica Coffee

Indonesia is the world's fourth-largest coffee producer after Brazil, Vietnam, and Colombia. The country is renowned as the home of some of the world's finest coffee varieties. As of 2024, Indonesia has approximately **1.27 million hectares** of coffee plantations, comprising about **933,000 hectares of Robusta** and **337,000 hectares of Arabica**. Notably, more than **98%** of these plantations are cultivated by small-scale farmers, reflecting the strong role of community-based agriculture in the sector. Indonesia is also distinguished as one of the few countries with a wide range of **Geographical Indication (GI)**-certified coffees, with **54 GI coffee** varieties, covering Arabica, Robusta, Liberica, and Excelsa. Within this national landscape, Aceh stands out as a **key coffee-producing** region. The province ranks **3rd** nationally in total plantation area and **4th** in total production. Aceh's coffee sector is predominantly Arabica-based, with approximately 92,324 hectares dedicated to Arabica plantations and 20,775 hectares to Robusta, reinforcing its reputation as **one of Indonesia's premier Arabica-producing regions**.

Gayo coffee is cultivated in the Gayo highlands, which include the big three of Arabica coffee in Aceh (Bener Meriah Regency, Aceh Tengah Regency, and Gayo Lues Regency). Gayo is an ethnic group that inhabits the Gayo highlands in the central Aceh region. The majority of people in this area are coffee farmers.

Coffee cultivation began in 1908 and is mostly Arabica coffee. Gayo is one of the largest Arabica-producing regions in Southeast Asia. Gayo coffee has been exported to various countries worldwide. Gayo Coffee has received various recognitions and international certifications because of its high quality, particularly organic coffee, and coffee with fair trade certifications as well.

Currently, Gayo Coffee continues to meet the demand for coffee in domestic and foreign markets by increasing productivity and improving quality (through agricultural extension and intensification).

SMEs: Teluk Gayo - Melaya

Profile

Teluk Gayo Farm is a coffee farmers' group from Bies, Central Aceh, established in 2018 under **PT Teluk Gayo Mandiri** with the brand ***Melaya Coffee***. Starting from conventional processing methods, they now produce specialty coffee that meets **SCAA/SCAI standards** from the Gayo Highlands in a sustainable manner, combining modern agricultural practices with strong local cultural values. The group consists of **30 core farmers and several partner farmers** from seven villages in the **Bies and Bebesen sub-districts**, managing a total land area of approximately **50 hectares**. Current production reaches **250 tons per harvest season**, serving both domestic and international markets. Teluk Gayo also actively supports farmers through training programs, distribution of superior seedlings, equipment assistance, and price guarantees that are 15–30% above market rates. Since 2021, Teluk Gayo has gained recognition in the international market and received the **Cup of Excellence – National Winner award**. Their coffee was auctioned at IDR 300,000 per kilogram and exported to Japan in a volume of 500 kilograms, marking the beginning of Melaya Coffee's export credibility.

Teluk Gayo's Activities

Since the farmers are mainly above 50, they have a responsibility to ensure **the regeneration cycle**. By upholding the values & propositions of Gayo Coffee beans, it is believed that it will be smoothly preserved. Embracing the farmers in Bies Penentanan is the baby step to make it happen. The farmers are working together and **innovating a better way of cultivation to optimize the cherry yield**, not only the quantity but also the quality as well. Teluk Gayo produces various **specialty processing and non-specialty** types such as fully washed (Dry & Wet Hull), natural, black honey, wine process, wild luwak, and robusta coffee. Custom types that are required by buyers are also available through the transfer of knowledge of processing, and then it will be replicated.

melaya

KOPI OLAHAN PEGUNUNGAN

The SME's Story

Melaya Coffee was founded to preserve the values and popularity of Gayo Coffee Beans both in the global and local markets. Gayo Coffee, regarded as one of the best coffees in the world, is predicted to be consumed with pride by Indonesians and Foreigners in the near future. The cherry seed is harvested from **"Bies Penentanan" in Takengon, one of Aceh's greatest cherry seed-producing places**. Led by a **4th-generation coffee farmer** (Mr. Iqbal) and embracing the communities of farmers, Melaya Coffee ensures the quality of each bean.

SMEs: Ulunowih

Profile

Ulunowih, in the Gayo language, means “head of the water”—a term that describes a primary water source that is essential to life. The name reflects Ulunowih’s philosophy as a source of benefit and sustainability for the Gayo community, especially coffee farmers. The Gayo Highlands are the center of Arabica coffee production and serve as the backbone of livelihood for more than 80% of the population. Ulunowih was founded in **2016 by two young Gayo entrepreneurs**, **Ihsanuddin and Sabardi**, who grew up in coffee-farming families in Central Aceh. Continuing this legacy, they built a business rooted in quality, partnership, and sustainability. Since 2020, Ulunowih has operated under **PT Aromabica Gayo Internasional**, which now partners with **more than 45 coffee farmers** from various farmer groups, communities, and independent farmer networks across Central Aceh, Bener Meriah, and Gayo Lues. The total partnership area covers approximately **140 hectares**. Aromabica’s Gayo coffee products—both green beans and roasted beans—have been marketed to **various cities across Indonesia** and exported directly to several countries, including **Malaysia, Qatar, Turkey, and Morocco.**

Ulunowih’s Activities

- **Sustainable Practice**: Ulunowih prioritizes environmentally responsible farming techniques that create long-term benefits for the ecosystem, the local community, and the quality of the coffee.
- **Quality Control**: Each coffee cherry is carefully hand-picked and meticulously sorted by our team to ensure that only the finest quality beans reach our customers.
- **Traceability**: Every bag of Ulunowih coffee is fully traceable to its origin, providing transparency, accountability, and consistent quality assurance.

Ulunowih produces a wide range of specialty-grade coffees, including **Specialty, Peaberry, Honey, Wild Luwak, Natural, Macampora, and Strong Macampora**. In addition, the company also offers commercial-grade coffee such as **Grade 1, Grade 2, Low Grade, and Robusta**, available in both **green bean** and **roasted bean** forms.

ULUNOWIH
•Specialty Coffee From Gayo Farmer•

The SME’s Story

Welcome to Ulunowih, your source for premium Gayo Arabica coffee beans. We are a dedicated team of farmers committed to producing the finest quality specialty coffee. Ulunowih represents the dedication of Gayo farmers to producing high-quality coffee. Our company, PT Aromabica Gayo Internasional, is based in Aceh Tengah, Indonesia, the heart of the Gayo region. Our farmers have generations of experience and a deep understanding of the coffee cultivation process.

SMEs: Gayoland Coffee

The SME's Story

Gayoland Coffee was established on June 27, 2013, under **UD Agro Aceh Besar**, and officially transformed into **CV Agro Aceh** on July 27, 2020. As a coffee industry player, Gayoland Coffee emphasizes hygiene, freshness, and a strong, authentic coffee flavor, offered at affordable prices so it can be enjoyed by coffee lovers from all walks of life. The coffee beans are sourced directly from farmers in **Central Aceh and Bener Meriah**, ensuring premium quality characteristic of the Gayo Highlands. The partnership model developed with farmers aims to ensure a **sustainable supply chain while maintaining consistent bean quality**. Gayoland Coffee products are widely available on various **online marketplaces** such as Bukalapak, Tokopedia, Blibli, and Shopee, as well as through social media platforms including Facebook and Instagram.

Gayoland's Activities

As a place of business, Gayoland have high hopes to be able to improve the economic welfare of coffee farmers who are in Central Aceh Regency and Bener Meriah Regency. In addition, we have goals to increases farmers' knowledge about the importance of maintaining the quality of coffee and empowers rare types of coffee to be further develop sustainably and innovatively. Gayoland produces various coffee end products from **green beans, roasted beans, grounded beans, and ready-to-brew drip bag coffee**. With various coffee types such as **Wild Luwak, Wine, Peaberry, Longberry, Specialty, Arabica Super Aceh, Arabica Natural, and Robusta**

Achievement

Gayoland Coffee has established a sustainable supply chain by partnering directly with farmers in Aceh Tengah and Bener Meriah, ensuring **consistent Gayo coffee quality while supporting local livelihoods**. Through strong quality control and expanded distribution across **national e-commerce platforms**, the brand continues to **grow its market presence** both in domestic and international markets. Beyond business objectives, Gayoland Coffee also carries out a social mission—allocating part of its sales proceeds to **support the rights and welfare of persons with disabilities**, in collaboration with the Sahabat Difabel Aceh Foundation.

Robusta Coffee

Robusta Coffee has a strong taste and is more bitter than Arabica Coffee. Robusta Coffee is widely used as the main ingredient for instant coffee or as a mixture of Arabica Coffee to improve the taste of coffee. Robusta coffee plantations are concentrated in Pidie, Aceh Jaya, Bener Meriah, Aceh Tengah Regency, and Aceh Selatan (South Aceh). The total plantation area is 20,775 Ha, with a total production of 6,610 tons in 2024.

Aceh Coffee Processing Industry

The demand for Gayo coffee in domestic and foreign markets is very high, particularly in the form of green beans. The government encourages the improvement of the quality of Aceh coffee to create a greater opportunity for developing a modern coffee processing industry. The popular culture of coffee consumption in Aceh is also a promising prospect for building the Gayo instant coffee processing industry.

Current project purpose: construction of the instant coffee processing industry based on market observations. Today, at least 10 instant coffee brands are sold in the market, which indicates an increase of instant coffee consumption in Aceh. Thus, the potential for development in this industry is auspicious.

SMEs: Portugis Coffee

Profile

Portugis Coffee is a Lamno-origin robusta coffee processing business based in Jaya Subdistrict, Aceh Jaya. Founded in June 2019 by local entrepreneur **Muhammad Haris**, the brand was created to restore pride and added value to Lamno's robusta coffee, which had long been supplied to Banda Aceh and marketed under other labels, often losing its regional identity. Inspired by Lamno's historical connection with the Portuguese dating back four centuries—reflected in some local descendants with distinctive European features—Haris chose the name "Portugis Coffee" to firmly associate the product with its place of origin.

Bawadi's Activities

Built on a **sociopreneurship concept**, Portugis Coffee ensures that profits are shared fairly with local farmers, creating mutual growth and sustainable benefits. The coffee is produced from selected **Lamno robusta beans**, roasted independently, then packaged and marketed to various provinces across Sumatra, Java, and Kalimantan. Despite setbacks during the Covid-19 pandemic, innovation—such as introducing palm sugar coffee variants and bottled drinks like Lamnobusta and kopi sanger—helped the business recover and expand. Entering its seventh year, Portugis Coffee continues to innovate while maintaining quality, driven by faith, perseverance, and consistency as the foundation of its sustainability.

Portugis Coffee Characteristics

Source of Coffee	Aceh Jaya Regency
Altitude	900m meter above sea level
Process	Natural – Dry Hulling
Coffee Type	Robusta
Numbers of Farmer	30 farmers
Production capacity	1000 kg/harvest
Harvest period	September – December

BUSINESS PROCESS

Cacao Plantation

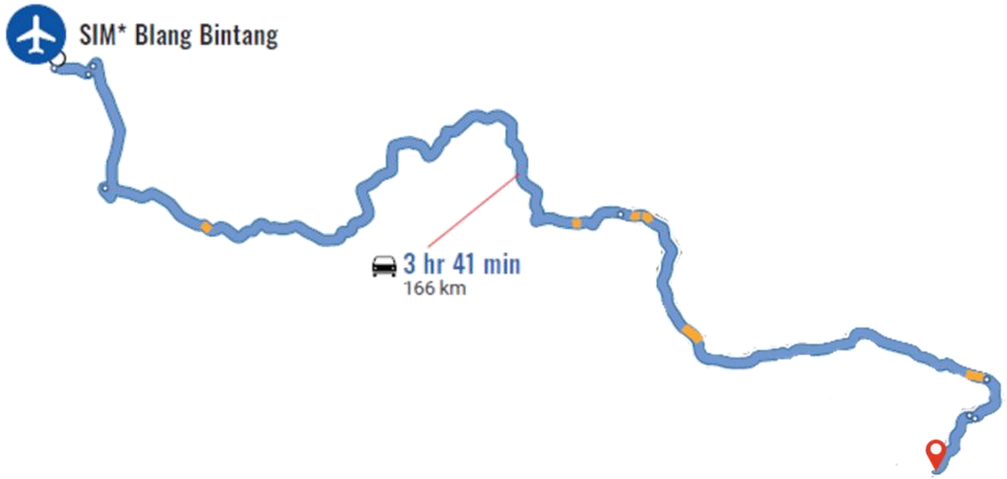

Indonesia is the world’s third-largest cocoa producer after Côte d’Ivoire and Ghana (ICCO, FAO data trends). The majority of Indonesia’s cocoa is smallholder-based, accounting for more than 95% of the national plantation area.

Aceh is one of the major cacao-producing regions in Indonesia, with plantations spread across almost all regions in Aceh, from the eastern part of Aceh to the outer western side of Aceh Province. Cacao plantations are concentrated in Aceh Tenggara Regency, Aceh Timur Regency, Pidie Jaya Regency, Aceh Utara Regency, and Pidie Regency. The total plantation area is 88,268 Ha, with a total production of 34,170 tons in 2024.

Cocoa plantations in Aceh are predominantly managed by smallholder farmers, contributing to rural income generation and regional economic resilience. Productivity improvements through rehabilitation, superior seedlings, and post-harvest handling remain key strategic priorities. With over 88,000 hectares under cultivation and annual production exceeding 34,000 tons, cocoa represents one of Aceh’s strategic plantation commodities with significant multiplier effects across farming and the local economy.

Pidie Jaya Regency: A Key Cacao-Producing Region in Aceh

Profile

Pidie Jaya Regency is located in Aceh Province, bordered by the Malacca Strait to the north, Bireuen Regency to the east, and Pidie Regency to the west and south. The regency covers an area of approximately **1,163 km²**, consisting of coastal lowlands and beach areas, with a predominance of highland terrain. Administratively, Pidie Jaya Regency comprises **8 districts and 222 villages**.

Established in **2007** as a result of regional expansion from Pidie Regency, Pidie Jaya occupies a strategic position along the **Aceh–North Sumatra national highway corridor**, enhancing its economic connectivity.

Land

Construction of the toll road in Aceh began in 2021 as part of Indonesia's national priority infrastructure program. The initial phase of the 74-kilometer **Sigli–Banda Aceh (Sibanceh) Toll Road** runs approximately 6–7 kilometers south of the Banda Aceh–Medan national highway corridor. Currently, with the toll road only partially operational, travel time from Banda Aceh to Pidie Jaya Regency is approximately **3 hours and 41 minutes**. Once fully operational, the toll road is expected to reduce travel time by an estimated 30–40%, significantly improving regional connectivity and economic accessibility.

Air

- **Sultan Iskandar Muda International Airport's** distance from Pidie Jaya Regency is 165 km via Sumatra Main Road/ Banda Aceh – Medan Road with a travel time of 3 hours and 29 minutes.
- **Malikul Saleh Airport's** distance from Pidie Jaya Regency is 103 km via Sumatera Main Road / Banda Aceh – Medan Road with a travel time of approximately 2 hours 17 minutes.

Sea

From **Pidie Jaya Regency**, access to major ports in Aceh is as follows:

- **Ulee Lheue Port**: 175 km via the Trans Sumatra (Banda Aceh–Medan) Road, with an estimated travel time of 3 hours 45 minutes.
- **Malahayati Container Port**: 142 km via the Banda Aceh–Medan Highway, with an estimated travel time of 3 hours 14 minutes.
- **Krueng Geukueh Port**: 115 km via the Trans Sumatra Road, with an estimated travel time of 2 hours 29 minutes.

Patchouli Plantation

Currently, Indonesia is the world's largest patchouli oil producer, which meets the needs of more than 80% - 90% of the world market. Patchouli is widely cultivated in Aceh. With its high alcohol content, patchouli is one of the most sought-after tropical plant varieties in Aceh

According to research findings, Aceh patchouli oil contains **30–34% patchouli alcohol** with an average yield of approximately **3%,** positioning it among the highest-quality patchouli oils globally. In 2024, the total planted area reached **1,274 hectares**, with a total production of **151 tons**. These conditions provide strong potential for the development of downstream patchouli processing industries. Patchouli is one of Indonesia's most important essential oil export commodities. Extracted through the distillation of dried leaves, patchouli oil is widely used in the **perfume, aromatherapy, cosmetics, pharmaceutical, and personal care industries**, with global demand continuing to grow.

- **Aceh** has the best patchouli oil in the world, with more than 1200 hectares in Aceh. Patchouli plantation concentrated in the regencies of Aceh Selatan, Aceh Barat Daya, Aceh Jaya, Aceh Barat, and Gayo Lues
- Simply-to-Produce and Low-Technological Needs. The supply chain for patchouli oil is not so complex, comprising farmers, collectors, and exporters.
- Patchouli oil is mainly obtained by steam distillation of shade-dried leaves of cultivated patchouli plants.

Segmentation by End-User

- Beauty Cosmetics & Personal Care (Hair, Skin, Facial, etc)
- Aromatherapy (Indoor, Automotive, Massage, etc)
- Food & Beverages
- Pharmaceuticals
- Others (Soaps & Detergents, Household/Retail, Anti-microbial and Insect Repellents)

Target Market

- Europe
- North America
- Middle East & Africa
- Asia Pacific
- Latin America

Segment Analysis

Among the type segments, the light patchouli oil segment is expected to account for a significant share in terms of revenue in the near future.
Among the nature segments, the organic segment is expected to account for significant revenue growth in the global patchouli oil market owing to the rising use of patchouli oil in various end-use industries.
Among the end-user segments, the cosmetics & personal care segment is anticipated to register the highest growth in terms of revenue in the target market due to its strong, slightly sweet, and intoxicating scent.

SMEs: Minyeuk Pret

MINYEUK PRET

ACEH AUTHENTIC PERFUME

Profile

Established in 2015, **Minyeuk Pret** is an Indonesian perfume brand born in Aceh, recognized as a pioneer and innovator in blending local wisdom, cultural heritage, and natural raw materials into captivating and authentic fragrances. The name *Minyeuk Pret* was deliberately chosen to affirm its Acehnese identity, derived from traditional terms long used by the Acehnese people to refer to perfume. Minyeuk Pret offers more than distinctive scents; each bottle carries stories and cultural values, elevating the natural richness and historical legacy of Aceh into the realm of modern perfumery. As the business expanded and demand grew both domestically and internationally, the founders established **PT Yakin Bersama Jaya** in 2018 as the official legal entity. This strategic step was taken to strengthen the company's business structure and to advance Minyeuk Pret's vision of becoming a pioneer in the development of Indonesia's locally rooted perfume industry.

Minyeuk Pret's Activities

Minyeuk Pret operates as a pioneering fragrance brand from Aceh that adds value to **local patchouli oil** by transforming it into authentic cultural perfumes, positioning itself as an innovator in the Indonesian aromatic industry, the company manages a Class B laboratory with a production capacity of **12,000 products per month**, fully compliant with national cosmetic standards (CPKB) and Halal certification. Their operational ecosystem is highly modernized, utilizing a hybrid workforce with talent, fulfillment warehouses in Bogor and Jakarta to optimize logistics, and advanced digital integration through ERP, CRM (RAKAN), and ACCURATE accounting systems. With experience sending to 23 countries and supported by hundreds of resellers and partner outlets in the domestic market, Minyeuk Pret focuses on international-standard marketing and excellent branding to promote Indonesian cultural values through scents.

The SME's Story

More than a century ago, Aceh's patchouli was exploited by foreign countries to support the development of their cosmetics industries, leaving little added value for its place of origin. In response to this history, a young Acehnese entrepreneurs founded **Minyeuk Pret** in 2015—an Acehnese perfume brand rooted in local pride and identity. Minyeuk Pret positions itself as a pioneer and innovator in the perfume industry by combining Indonesia's abundant natural raw materials with compelling local stories, creating fragrances that embody authentic regional character. The name itself reflects Acehnese heritage: *minyeuk* means oil and *pret* means to spray. Through this philosophy, Minyeuk Pret not only strengthens its brand identity but also promotes Aceh's language and culture to a wider global audience.

CSR (CORPORATE SOCIAL RESPONSIBILITY)

Deeply rooted in its commitment to its hometown, Minyeuk Pret channels its success back into the community through a diverse range of **Corporate Social Responsibility (CSR)** initiatives designed to uplift those in need. Under the banner of "We Love Our Hometown," the company actively builds **homes for the need (rumah dhuafa)** and installs **waqf wells** to ensure clean water access for local Quranic study centers. Beyond infrastructure, they foster a spirit of consistent giving through the **#KenyangBareng** program, which distributes essential food packages every Friday, alongside regular financial support for **orphans** and educational assistance for traditional study halls (**balai pengajian**).

PRODUCTS

SMEs: Yagi Natural

Profile

PT Yagi Natural Indonesia, through its brand Yagi Forest Skincare, was founded in response to the founder's concern over conventional skincare products containing hormone-disrupting ingredients. The company develops natural, safe, and environmentally friendly skincare solutions specifically formulated for sensitive skin and eczema-prone conditions. The name "Yagi," which means butter in Azerbaijani, was chosen to represent the softness and nourishing benefits of Illipe Butter. Embracing the philosophy of slow beauty, Yagi not only promotes healthier skin but also contributes to the preservation of tropical forests in Aceh and Indonesia, while empowering indigenous communities and local farmers. Through a non-timber forest product–based approach, fair supply chains, community education, and ongoing mentorship, Yagi Forest Skincare remains dedicated to protecting the planet, nurturing the skin, and cultivating hope.

Yagi's Activities

Yagi Natural Skincare is a passionate business and environmental leader seeking to transform Indonesia's skincare industry towards a more sustainable and responsible product. It strives to make natural skin care products mainstream while adding value to Indonesia's best-quality but under-utilized ingredients. Currently, Yagi Natural Skincare focuses on cocoa butter to produce soap, shampoo, body butter, lip balm, scrub, and other products. Crafted for health-conscious individuals, Yagi is made with gentle but effective natural ingredients. It is providing additional value for consumers with special needs for skin care (e.g. dry-sensitive skin), mothers and babies, and individuals with active lifestyles, also producing custom products for hotels and resorts.

yagi

Facial Care

Our Facial care are started with a lip balm, and we are now developing a natural maske

Bath and Body

Our core products are focused on a basic care for maintaining skin health, such as Body butter, Soap Bar, Body wash and Body scrub

Hair Care

Carefully curated for various hair and scalp problems, its natural ingredients are safe for adults, kids and babies

The SME's Story

Yagi Forest Skincare is committed to elevating Aceh's natural potential by utilizing leading local commodities such as patchouli oil, coconut oil, citronella, and coffee. These ingredients serve as key elements in its product formulations—not only for their remarkable skincare benefits but also to support sustainable supply chains and improve the livelihoods of Acehnese farmers. Guided by its mission—**transforming the personal care and skincare industry toward greater sustainability and natural integrity through the use of the finest local ingredients**—Yagi continues to strengthen its impact across both environmental and social dimensions.

Agricultural

Aceh Tengah Regency is a highland area with an altitude of 500-2600 meters above sea level, located at 40 22’14.22 “- 40 42 ‘40.8” North latitude and 950 15’ 23.6 “- 970 22 ‘10.76 East Longitude.

The capital city of Aceh Tengah is Takengon, it is surrounded by mountainous areas and has a tropical and cool climate, with the lowest temperatures at 20-10 degrees and 26.6 degrees is the highest. This condition makes Aceh Tengah a potential and suitable area for agriculture. Most of the business sector structure has not shifted from the agricultural, forestry, and fishery. Those play a big role in driving the economy of Aceh Tengah Regency.

SMEs: Capli

Profile

Capli, operated under **PT Rayeuk Aceh Utama**, is a pioneering culinary MSME from Aceh founded in **2018** by Yuliana and Murtala that specializes in authentic, preservative-free **Acehnese green chili sauce (Sambal Ijo)**. Driven by a mission to empower local farmers in the Gayo Highlands, the brand ensures price stability for raw materials (chili prices) while utilizing traditional preservation methods like Asam Sunti to create a healthy, MSG-free product. By integrating digital marketing and local community employment. The brand was born from a social mission to stabilize chili prices for local farmers while providing consumers with a healthy, preservative-free traditional condiment.

Minyeuk Pret's Activities

Vision:

- To become the national icon and largest of Acehnese chili sauce and condiments in Indonesia, while being a global solution for local farmers by transforming raw commodities into high-value, sustainable products.

Mission:

- Major sales across all provinces of Aceh and throughout Indonesia
- Entering the modern retail market for both the offline and online markets
- To partner directly with farmers in the Gayo Highlands, ensuring fair "Floor Prices" (HPP) to protect them from market volatility, with a target of more than 100 chili farmers across Aceh.
- To produce 100% natural, non-MSG, and preservative-free sauces using traditional Acehnese preservation methods (Asam Sunti).
- To accommodate and contribute to the development of chili cultivation technology in Aceh.

The SME's Story

At the end of 2017, we met a green chili farmer in the highlands of Gayo Lues who faced recurring losses due to drastic price drops during harvest season, with bird's eye chili selling for only IDR 5,000–7,000 per kilogram —often below harvesting costs due to middlemen price manipulation. Many farmers were forced to let their crops rot in the fields. Recognizing both this challenge and the absence of a strong Acehnese sambal brand, we developed a value-added solution and, in late 2018, we launched "**Capli**" **Aceh Green Chili Sauce** as a product rooted in local impact and identity.

Livestock

The area that is suitable for livestock grazing in Aceh is 18,569 ha.

The Government of Aceh, through **the Aceh Medium-Term Development Plan (RPJMA) 2025–2029**, has included a plan in the livestock sector as one of the top priority activities, which includes:

- Development of Integrated Cattle Farming Areas (in Aceh Besar, Aceh Jaya, and Bener Meriah)
- Development of Integrated Buffalo Farming Areas (in Gayo Lues and Simeulue)
- Development of Goat and Sheep Farming Areas (in Pidie and Bireuen)
- Community-based poultry farming development programs

The main activities in this project are infrastructure development, building irrigation and grazing land, construction of feedlots, breeding rooms, and cattle fattening. Some of the potential areas include:

Bener Meriah Beef Industry Development Project

Suitable for Development: Breeding and Main Cage. Land Area: 4.000 Ha

Pidie Jaya Beef Industry Development Project

Suitable for Development: Breeding
Land Area: 500 Ha

Nagan Raya Beef Industry Development Project

Suitable for Development: Breeding Lot as Research Center.
Land Area: 5.000 Ha

Aceh Tengah Beef Industry Development Project

Land Area: 2.280 Ha

Fisheries

Aceh Province is located on the western tip of the island of Sumatra, surrounded by the Indian Ocean in the west-south region of Aceh, as well as the Malacca Strait and Andaman Waters in the northeast region of Aceh. Aceh's marine and fishery resources can be categorized as natural resources with promising potential and can escalate Aceh's regional economy.

Aceh has a coastline stretching **2,666 km** and a marine area covering **295,370 km²**, consisting of **56,563 km² of coastal territorial waters** and **238,807 km² of Exclusive Economic Zone (EEZ)**. With this significant marine potential, total capture fisheries production in 2024 reached **427,640 tons**, comprising **10 major fish species**.

Out of 23 regencies/cities in Aceh Province, **18 are located in coastal areas**, representing approximately 78% of the total. This extensive maritime area provides substantial potential and serves as a strong foundation for the development of Aceh’s marine and fisheries industry.

Approximately **5% of Aceh’s total population** depends on the fisheries sector, both directly and indirectly, underscoring its important socio-economic role. Based on the latest report in 2024, Aceh recorded **112,563 fishermen**, comprising **31,104 fishermen households**, supported by **26,851 fishing vessels** of various gross tonnage (GT). In the same year, fisheries production reached **427,640 tons**, reflecting a significant increase of **43.8%** compared to the previous production level of 297,222 tons. Furthermore, in 2025, the fisheries sector contributed **5.61%** to Aceh’s Gross Regional Domestic Product (GRDP), highlighting its substantial contribution to the provincial economy.

Economically significant capture fisheries production in Aceh comprises **15 key commodities**, including species from the **pelagic and demersal fish groups**, as well as non-fish commodities such as **shrimp, crustaceans, and mollusks**. Aceh also produces several high-export-value capture fisheries commodities, including tuna, swordfish, white pomfret, mackerel tuna, snapper, grouper, stingray, pompano, mackerel, and lobster, reinforcing its strong position in both domestic and international seafood markets.

Aceh has 18 coastal areas from its 23 districts and cities, all are positioned in the Indonesian State Fisheries Management Areas (WPPNRI), **WPP NRI 571** Malacca Strait, and **WPP NRI 572** Indian Ocean in the sea, as well as in one **WPP PUD 439** in inland waters, which represents the characteristics and dynamics of ecological, socio-economic, and management complexity. These three areas became the cluster grouping and differentiating areas with prospective development and investments.

Western Cluster

- Sea Water Reverse Osmosis (SWRO) in Sawang, Blangpidie, Tapaktuan
- Fishermen's Refueling Station in Sawang, Labuhan Haji, Tapaktuan
- Frozen Fish Processing Unit (UPI) in Aceh Jaya
- Refrigerator Truck in South Aceh
- Dry Fish Processing Unit (UPI) in Aceh Barat
- Shipyard (Docking) in Sawang / Labuhan Haji
- Cold Storage in Sawang, Tapaktuan, Labuhan Haji, Aceh Jaya, and Aceh Barat

Northern Cluster

- Dry Fish Processing Units (PPS Kuta Raja and Idi, Aceh Timur)
- Ice Factory (PPS Kuta Raja, TPI Sabang and TPI Aceh Besar)
- Sea Water Reverse Osmosis (SWRO) at PPS Kuta Raja
- Fisherman Refueling Station (PPS Kuta Raja)
- Shipyard (PPS Kuta Raja and Ulee Lheue/Malahayati Port)

Eastern Cluster

- Sea Water Reverse Osmosis (SWRO) in Aceh Tara and Lhokseumawe
- Aceh Timur and Aceh Utara TPI ice plant
- Fishermen's Refueling Station (Bireun)
- Frozen Fish Processing Unit (UPI) in Aceh Utara
- Refrigerator Truck in Aceh Utara and Malaysia
- Docking in Sawang/Labuhan Haji
- Cold Storage in Aceh Timur

Idi Fishing Port

Aceh Timur Regency

Project Description

In 2024, **Aceh Timur Regency** recorded a total fisheries production of **51,039 tons**, supported by **9,861 fishermen** and **1,360 fishing vessels**. The fleet primarily consists of motorized vessels ranging from **5 GT to 200 GT**, reflecting the region's strong offshore fishing capacity. The operational area of **Idi Fishery Port** covers approximately **62.5 hectares** and supports both capture fisheries and aquaculture production. Key aquaculture commodities include **tilapia, catfish, milkfish, black tiger prawns, white shrimp, fire shrimp, and crabs**, demonstrating the diversified fisheries potential of the regency.

Metro Mina Park

Aceh Timur Regency

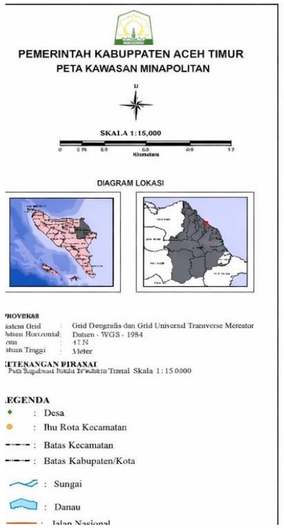

Project Description

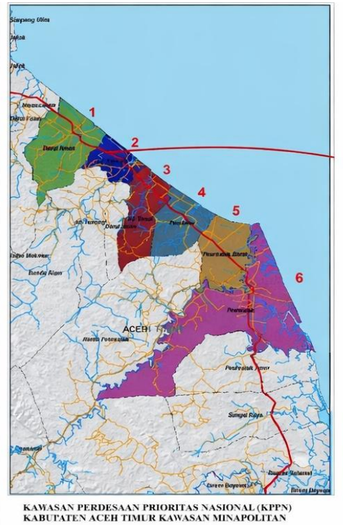

Aceh Timur Regency is strategically located along the **Strait of Malacca**, providing the region with abundant marine resources.

In 2024, Aceh Timur recorded a total fisheries production of **51,039 tons**, supported by **9,861 fishermen,** and **1,360 fishing vessels**. The fleet primarily consists of motorized vessels ranging from **5 GT to 200 GT**, reflecting the region's strong offshore fishing capacity. The total fisheries production value in 2024 reached **IDR 1,354,335,000,000.**

In addition to capture fisheries, Aceh Timur has extensive aquaculture pond areas covering **18,780 hectares**, with annual production reaching **13,509 tons**. The total production value from pond aquaculture amounts to approximately **IDR 466,210,150,000 per year**.

Furthermore, the regency also supports a community-based salt industry. As of 2019, there were **209 salt farmers**, organized into **16 groups**, managing a total land area of **10.61 hectares**. The annual production value of the salt sector reaches approximately IDR 2,781,500,000.

Air Transport

The nearest airport is Malikul Shaleh Airport which is located in Muara Batu Sub-district, North Aceh Regency with a distance of 112 km from the Metro Mina Park. Besides, there also is Kuala Namu International Airport which is located in Deli Serdang District, North Sumatra Province, a distance of 283 km from the Metro Mina Park location.

Sawang Ba'U Fishing Port

Aceh Selatan Regency

Project Description

Gampong Sawang Ba'u is one of the key fisheries centers in Aceh Selatan Regency. In 2024, Aceh Selatan recorded a total fisheries production of **26,322 tons**, supported by **9,462 fishermen** and **2,231 fishing vessels**. The fleet consists of non-motorized boats, motorized vessels ranging from 5 GT to 100 GT, as well as inland water fishing boats (perairan darat). The dominant fishing gear utilized in the region is **purse seine**, with the primary catches comprising skipjack (cakalang) and tuna, reflecting the strong pelagic fisheries potential of the area.

Facilities and Capacity

- Jetty : 1.600 m2
- Water break : 800 m3
- Port pool : 300 Ha
- West-side discharge and load jetty : 160 m2
- East-side fish market : 600 m2
- West-side fish market : 800 m2
- Fish packaging building : 150 m2
- Port management office : 452 m2
- Generator set housing : 48 m2
- Water Tower : 1 Unit

Air Transport

The nearest airport is Cut Nyak Dhien Airport, located in Nagan Raya Regency, approximately 150–170 km from Gampong Sawang Bau (around 4–5 hours by road, depending on route and conditions). Another alternative is Sultan Iskandar Muda International Airport, located in Aceh Besar Regency, approximately 400–430 km from Gampong Sawang Bau (around 10–12 hours by road).
